

### A message from the Director ake It Outdoors!

Dear Larimer County Citizens,

I trust that all of you took the opportunity this year to connect to the many parks and open spaces the County provides for your enjoyment. Whether it was taking a hike up to the ever-popular Horsetooth Mountain Open Space or sailing the abundant waters of Carter Lake, you made that connection to the great outdoors.

We discovered this year, even during these difficult economic times, visitors stayed closer to home and recreated in our parks and open spaces more than ever before. Getting outdoors remains

#### **Larimer County government officials**

2009 Board of County Commissioners: Kathay Rennels, Steve Johnson, Tom Donnelly

2010 Board of County Commissioners: Tom Donnelly, Steve Johnson, Lew Gaiter III

County Manager: Frank Lancaster Public Works Director: Marc Engemoen a high priority to you and your family here in Northern Colorado.

In 2010 we will continue providing new and improved recreation opportunities. Discover the new, exciting trails awaiting you at Red Mountain Open Space; and, for you sun worshippers check out the new swim beach at Horsetooth Reservoir County Park.

I especially want to thank the staff of the Department of Natural Resources for their dedication in serving you with safe and enjoyable recreation, and our Board of County Commissioners for their support of our programs.

Remember to "Take It Outdoors" in 2010.

Gary K. Buffington Director, Dept. of Natural Resources

Larimer County manages an incredible variety of public lands, from mountains to prairies, for their use, enjoyment, and protection on behalf of all of us whose sales taxes make them possible. As a proud citizen who has served on both the Open Lands and the Parks Advisory Boards, I'm certain in 50 years our grandchildren will look kindly on us for doing this for them. >>

### Connecting People to the Land and Its Resources

We heard it first with Richard Louv's book *Last Child in the Woods*— connecting kids to the land is critical for their mental and physical well being. Perhaps that was the first aha! moment: we're not just a land conservation and recreation agency, we are also about people and how they relate to the land and its resources. We've heard it again at conferences and from national conservation organizations. In 2009 we reexamined how we do our work, why we do our work, and for whom, resulting in more questions, out-of-the-box ideas, and new, uncharted waters.

Our efforts to connect people to the land and its resources through better customer service and communication, as well as actively reaching out to those we have not previously engaged, will be in small steps. These efforts will result in forging new community partnerships, providing new land use opportunities, and overall being more inclusive of all County residents. It will be incremental in coming, but it will come.

Silver Leaf Nature Path—a small-grant awarded project. Photo: Jemna Swindell

Crescent Lake cleanup—a small-grant awarded project. Photo: Patty Rolfe

The nature path and the outdoor classroom are now truly ready for nature to
take over their care. People and animals
are using the area and our volunteer-led
construction project is holding up. You gave
us the opportunity as residents to direct our
own improvement of our outdoor living
spaces and that is valuable.

Jemna Swindell and the Silver Leaf Beautification Committee

### Small Grants for Community Partnering

These grants allow Larimer County citizens to apply directly for Open Spaces Sales Tax dollars for their community projects.

In 2009, ten local projects received \$11,525

 an educational natural area at an elementary school, maintaining a neighborhood lake,
 building a handicap accessible nature trail, tools and supplies for volunteer trail crews, xeriscaping and reclamation projects, native plantings
 Gration

Grant categories

 to provide or enhance
 natural areas, provide
 linkages with existing
 open lands, or provide
 opportunities for
 environmental
 education, outdoor
 recreation or nature
 interpretation

Peninsula at Horseshoe Lake Native Plant Woodland Cluster—a small-grant awarded project. Photo: Marge Black

With the goal of connecting more people and communities to the land, future grant categories were expanded to include:

- Agriculture
- · Increased access to open lands
- Research on open spaces

### Cleaning Up our Act in the Parks, and Yours, Too!

All of our surveys and research pointed to one key element: clean campers are happy campers. As projects from the 2007 Master Plan were prioritized, our visitors made it clear shower buildings were high on their lists. As the department's first shower facilities went into use this summer, visitors to Horsetooth confirmed their assertions by making great use of these buildings. These custom built structures are an attractive example of form meeting function.

Boaters agreed that cleanliness and happiness are closely related. Statewide Aquatic Nuisance Species regulations came to Horsetooth and Carter this year, requiring a physical inspection of every vessel entering the water. This massive undertaking made both county staff and our boating visitors appreciate the importance and convenience of a Cleaned—Drained—and Dry boat. Savvy boaters had the inspections stations moving quickly, and dedicated inspectors made a real impact on the protection of waterways while making the process as hassle free as possible.

Visitor services building at Horsetooth Reservoir Photo: Paul Treakle

ADA upgrades on the east side of Horsetooth Reservoir Photo: Steve McCorkel

We finished cleaning up *our* act as well, more specifically regarding the Americans with Disabilities Act. Through a partnership with the Bureau of Reclamation the Department of Natural Resources completed retrofits identified in an accessibility evaluation. Construction crews kept busy putting these great projects on the ground. The pride in their work really shows.

Despite our new emphasis on hygiene, the most powerful reflection of 2009 was perhaps in the view found looking across the reservoirs this summer. Rains kept water levels higher than we had seen in recent memory. Near-full reservoirs and a brilliantly green spring rewarded long-standing visitors and welcomed new visitors to these great Larimer County resources.

As we look forward to 2010 we extend our commitment to providing great places to play. Visitors to Horsetooth will see an update to the swim beach facilities in South Bay. With the potential construction of another shower facility we hope to have some clean and happy campers at Carter Lake as well. Projections for good water levels in 2010 should keep you out of the mud, but if they don't, grab your rubber ducky or your loofah and come check us out anyway!

### Volunteers Cast a Long Shadow!

The Department of Natural Resources fosters volunteerism and recognizes volunteers as essential to building healthy and quality outdoor education, recreation, and conservation opportunities.

The Volunteer Program supports the department's mission through efficient, effective, and appropriate use of its volunteers. Goals are designed for growth, organization, and efficiency, and for making the "volunteer experience" something special.

To be dynamic, a continuous cycle of planning, implementation, assessment, and refinement allows for steady improvements, and insures the program adjusts to changing environments. Volunteers are integral to assessing our future direction.

Volunteers donated over 50,000 hours in 2009 equaling \$1,085,930.70\* or over 20 full-time employees. What an incredible effort and what an incredible impact!

If you are interested in volunteering, please contact CJ Cullins, 970-679-4552, ccullins@larimer.org, or

www.larimer.org/nrvolunteer.

Red Mountain Open Space. Photo: Gregory Mayse

Wish I was a person who could come up with the right words to explain what we felt about your two new open spaces, Red Mountain and Soapstone. Perfect comes to mind. You guys did an amazing job of making these two places into one of the most equine friendly areas to ride... I have told all my members to put these trails on their must ride lists... you did a wonderful job and we will enjoy it for years to come.

# of Mice and Water Trucks Planning, Development and Resource Management Program Activities

### Recreation and wildlife habitat protection go hand in hand

This water truck was used to maintain newly planted shrubs along the Pleasant Valley Trail, near Laporte. The shrubs help improve habitat along this trail corridor, and may help in the bigger picture of protecting the Preble's meadow jumping mouse.

Photo: Dave Lentz

#### Sorting that woody biomass

Larimer County Forestry Program partnered with Peak to Peak Wood (www.peaktopeakwood.org), operating two woody biomass sort yards, one in Stove Prairie and one in the Red Feather Lakes area. Above, local residents disposed of logs from their properties from forest thinning projects, fire mitigation efforts, and mountain pine beetle removals. The logs were then processed into product at a mill. These yards will be open to the public again in 2010.

Photo: Jeffrey Boring

#### Counting the years at River Bluffs Open Space

Research is integral to sound natural resource management at the Department of Natural Resources. This archaeologist was hired to study the prehistoric uses of a bluff area on River Bluffs Open Space. Results showed prior occupation by Native Americans during the Early Ceramic Period, about 1,800-800 years before present.

## How do you measure the environmental health of an open space?

In 2009, Natural Resources staff adopted a new scientific approach to study the ecological integrity of each Larimer County open space. Staff assisted by volunteers (shown below at Red Mountain Open Space) measured plant species diversity for an ecological report card. This approach, to be employed every three to five years, helps us make adaptive management decisions.

### What happened with those weeds in 2009?

- The Larimer County Weed District received grant funding from The Interstate Pest Control Compact and Colorado Department of Agriculture for a 3-year program on education and management of 'List A' weed species.
- County weed management staff are collaborating with Dr. Andrew Norton, the insect bio-control professor at Colorado State University, on a weed management project at Red Mountain Open Space. The project establishes a viable population of weevils that feed exclusively on dalmatian toadflax, a noxious weed species, then monitors impact over time.
- The CSU weed science program and Larimer County Weed District are working closely on weed management and native plant restoration field studies. Each site is in an area of a specific weed species problem with numerous plots typically spread over 1-2 acres. The field studies will be demonstration sites for outreach and education tours and data collection showing best management practices.
- The Weed Management Program revised and updated its website www.larimer.org/weeds to include many new photos, management guidelines, and information on weed management and range and pasture restoration.

# REPORT CARD TO THE CITIZENS

### 2009 Improvements

#### Red Mountain Open Space

Development of the trailhead and trail system at Red Mountain Open Space including picnic shelters, an outdoor classroom, kiosk, and livestock water access. Road access was completed and the area opened to the public.

2009 Project Cost: \$1,136,700

Partners:

Great Outdoors Colorado: \$340,000 Roundup Riders of the Rockies: \$12,500 Larimer County Horseman's Association: \$500

Larimer County Engineering Dept.

Larimer County Open Lands: \$783,700

#### Hermit Park Open Space

Improvements to Bobcat Campground including improved campsites, addition of camphost sites, and new vault toilets.

### pen Space Tax Revenues Benefit All of Larimer County

The 1/4-cent Help Preserve Open Spaces (HPOS) sales and use tax revenue is shared with the County's eight municipalities. The tax continues through 2018, and is not imposed on food or prescription drugs. The total revenue collected to date is over \$114 million.

Distributions to municipalities are based upon the highest yield of either population or sales tax generation. This revenue sharing agreement ensures that residents throughout the county receive benefits from the Open Space sales tax.

### Summary of Finances

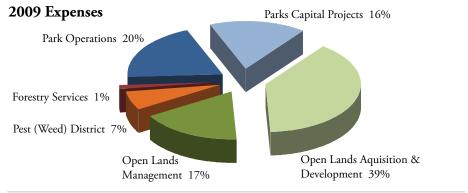

The Larimer County Department of Natural Resources includes the Parks Program, the Open Lands Program and the Weed & Forestry Program.

Revenues are realized from a number of sources and totaled 9.7 million in 2009. Expenses for 2009 were 9.2 million including a number of one-time capital development projects for both Parks and Open Lands.

Major capital projects in 2009 included development at Hermit Park, acquisition of conservation easements in the Buckeye area and construction of part of the new Poudre River Trail. Work has also continued for developments at Red Mountain Open Space, the Horsetooth South Bay Campground, Shower Facility and Swim Beach Improvement, and Inlet Bay Camper Services Building. Additional work is being done relating to ADA compliance and retrofits at all reservoirs.

#### 2009 Revenues

Three figures are unaudited. Audit to be completed in mid 2010.

Larimer County contains some of the most beautiful and unspoiled natural areas in the state of Colorado. Our desire is to preserve these areas for the enjoyment of future generations and to make them accessible for the enjoyment of all current county residents.

Steve Johnson, County Commissioner District 2

Eagle's Nest Open Space. Photo: Rick Price

Major Donors of the Open Lands Program

#### Giving More Than 100%

Conservation and recreation continue to be top priorities for county citizens, even in these tough economic times. Several made either land or cash donations that benefit everyone in Larimer County.

Land donations provide scenic viewsheds, wildlife habitat, and preservation of our working farms and ranches. Cash donations provide for trailhead amenities, such as water, that many can benefit from directly.

Amazingly, donations, partnerships and grants have leveraged \$1.13 for every open space sales tax dollar received since 1996—a great return on investment for Larimer County citizens!

### Keeping Communities Connected with the Land

#### Artist of the Year: Diane Findley

The Open Lands Visual Artist of the Year program

- Connects the natural beauty of Larimer County's Open Spaces with the local art community, and
- Shows the public the connection between art and nature.

Each year the chosen artist creates art inspired by a Larimer County-managed open space. A piece of that artwork is donated to hang in public areas of County facilities. Diane Findley, the 2009 Visual Artist of the Year, painted twelve amazing pieces inspired by sites all over the county. The piece donated to the County is titled "Poudre River" and is on display all year on the second floor of the County Courthouse Offices Building in Fort Collins.

#### Senior Tax Work-off Staff

Senior Tax Work-off employees (and staff) enjoy an end-of-season "thankyou" celebration. These Larimer County citizens worked 191 hours in the administrative offices at the Bison Visitor Center. Their help was invaluable. Throughout the department in 2009, Senior Tax Work-off employees worked 822.5 hours.

Photo: George Kral

Our open lands add greatly to the wonderful quality of life here in Larimer County and as a parent I am very interested in seeing that continue. Larimer County has made a commitment to preserving open lands and I am honored to serve as liaison to the Open Lands Advisory Board.

Tom Donnelly, County Commissioner District 3

#### **Department of Natural Resources** 1800 S. County Road 31 Loveland, Colorado 80537 970-679-4570

#### Free Firewood Program

Firewood from trees cut to complete forest management projects including to control pine beetle and mistletoe at Horsetooth Mountain Open Space was stacked by volunteer and Alternative Sentencing groups. It was available to the public on Free Firewood Collection days, and provided an alternative heating source for many local families.

#### **Education Program**

2009 was a banner year for the Education Program with more programs offered and visitors contacted than in any other year to date. The most vital part of the Education Program remains the school field trips, where over 1,000 students from Loveland and Fort Collins get a day of environmental education at the Devil's Backbone Open Space and Horsetooth Mountain Open Space.
