

FRAUD ALERT

Phony Package Delivery Email Scams

Common Victims: Anyone

Method of Contact: Email

In these scams, victims receive unsolicited emails stating delivery attempts of one or more packages has been unsuccessful. You are then instructed to click on a link within the email. Doing so, however, will download a virus that can search your computer for personal and financial information. If you are expecting a delivery and have concerns, contact the company directly using verifiable contact information – not information contained in a suspicious email. More information available from the Better Business Bureau at <http://www.bbb.org/>.
