PROPOSED SYSTEM INFORMATION

No. of Bedrooms/Design Capacity: Engineer:
Included with Application:
Plot Plan*1 Soils Report* Sketch Plan*2 Engineer's Design*3

*-Required for all New System, Major Repair & Remodel/Upgrade Permits.

1-A plot plan is required for Sealed Vault permits.

2-A sketch plan is a brief description of the proposed use of the system, calculations for septic tank and soil treatment area size, proposed location of components, and depth to tank and infiltrative surface.

3-Engineer's Design required for systems with percolation rate outside of 5-60mpi range, bedrock or groundwater within 4' of grade, pressure distribution, and sites with slope of >30%. Requirement for a soil report on major repairs may be waived if a previous report is available for the proposed repair site.

Note: Test pits must remain open for inspection by Larimer County unless they have already been inspected prior to permit application through a Site Evaluation.
