OUR MISSION

To establish, protect and manage significant regional parks and open lands providing quality outdoor recreational opportunities and stewardship of natural resource values. We are committed to fostering a sense of community and appreciation for the natural and agricultural heritage of Larimer County for present and future generations.

ACHIEVING A MILESTONE IN LAND CONSERVATION

The above photo, showing two hikers looking west across Red Mountain Open Space to the peaks of the Front Range, has become an emblematic image for Larimer County Department of Natural Resources. It exemplifies the balance between conservation and recreation we strive to achieve every day.

On Jan. 10, 2018, the department reached the significant milestone of 50,000 acres of land conserved in Larimer County. As we’ve worked to acquire and protect open space in the county over many decades, we’ve sought to maintain this balance, seeking opportunities to offer outdoor recreation while ensuring these lands maintain their intrinsic values.

Red Mountain Open Space is a prime example of this balance. Portions of the 14,980-acre open space are accessible to hikers, bikers and outdoor enthusiasts; while others are set aside to protect wildlife habitat, cultural sites and rare plant communities and support ranching and agriculture.

As you peruse this report, you’ll see examples of ways we seek to maintain this balance. Last year, we conserved large tracts of land in the Horsetooth area, pioneered a water deal that sets a model for protecting farmland and took a proactive approach to an exotic tree pest. At the same time, we built several miles of natural surface and paved trails and offered a myriad of ways to enjoy the outdoors.

Of course, none of our accomplishments over the past year – or the 50,000-acre milestone – would be possible without the ongoing support of our partners, funders and all of you who live, work and play in Larimer County. So, thank you for continually supporting conservation and recreation!

Thank you as well to our professional staff, our outstanding citizen advisory boards and especially to our Board of County Commissioners for their guidance and support.

On your next hike, boat ride or fishing trip, take a moment to ponder the balance we all can achieve as both recreationists and stewards. Now, get outdoors and play!

Gary Buffington

Larimer County Department of Natural Resources has crested the 50,000-acre milestone for land conservation in the county. Hooray! In total, the department has conserved 50,266 acres since 1982, when Larimer County first acquired the land that is now Horsetooth Mountain Open Space thanks to a citizen-initiated ballot measure. These acres consist of land purchased outright by Larimer County, placed under a conservation easement held by the County, or conserved by a partner with financial or other support from the County. This milestone was made possible thanks to the citizens of Larimer County who have continually voted in favor of open space, as well as the many partners, funders, landowners and others who have supported the department’s conservation efforts. Thank you!

PROTECTING LAND IN THE HORSETOOTH AREA

Over the course of nearly a year, Larimer County and the City of Fort Collins closed on a series of four land acquisitions south and west of Horsetooth Reservoir totaling 2,492 acres, with the final deal closing in the early part of 2018. Many of these acquisitions were more than a decade in the making.

All the newly conserved land is adjacent to existing open space, including Horsetooth Mountain Open Space, Devil’s Backbone Open Space and Coyote Ridge Natural Area.

Of the 2,492 acres, 1,359 acres were fee transactions, meaning either Larimer County or Fort Collins owns the land outright, and 1,133 acres were conservation easements, meaning only the development rights were purchased and the land remains privately owned. Great Outdoors Colorado (GOCO) provided $4.8 million, or 42%, of the total acquisition costs.

This year, Larimer County Department of Natural Resources staff will conduct plant, wildlife, historical and archaeological surveys of the properties. The future of these lands, including any public access or outdoor recreation, will be determined through public planning processes over the coming years.

For a fact sheet on the transactions and a map showing the new properties, visit www.larimer.org/naturalresources (search under Spotlights).

THE LAND IN THE HORSETOOTH AREA WAS CONSERVED TO PROTECT THE FOLLOWING VALUES:
Whether preserving open space, piloting water-sharing agreements or preparing for exotic tree pests, Larimer County Department of Natural Resources is working to further conservation across our great county for the benefit of present and future generations.

NAVIGATING NEW WATERS

Larimer County’s agricultural heritage is in jeopardy, as farmland and water rights are continually converted to other uses. In 2016, Larimer County Department of Natural Resources purchased a 211-acre farm to help buck this trend but needed to offset the high cost of the farm’s water.

To do so, the department convened a team of experts in water, agriculture and law to determine how much water the farm needed to be viable, and how much water could be sold or shared.

With this knowledge in a Farm and Water Viability Plan, the department was able to reach a deal last year with the City and County of Broomfield. Some shares of water were sold outright to Broomfield and most were kept by Larimer County, with a number to be shared. This water-sharing agreement is known as an Alternative Transfer Method (ATM), which is being promoted in Colorado’s Water Plan as a way to keep farmland viable while providing water for municipal and industrial needs.

Through this deal, Larimer County and Broomfield implemented Colorado’s first perpetual agriculture-to-municipal ATM, creating a model for others in land and water conservation to follow. For details on the agreement and the farm’s water portfolio, visit www.larimer.org/naturalresources.

ANTICIPATING A TREE PEST

The emerald ash borer is spreading across the Front Range of Colorado. An infestation of the exotic tree pest has been confirmed in Boulder County about 4 miles south of the Larimer County line.

Taking a proactive approach to the emerald ash borer, Larimer County Department of Natural Resources removed 72 of the 89 ash trees in its campgrounds and trailheads last year. The remaining 17 ash trees, deemed worth saving by the County forester, will be treated to prevent them from getting the insect once it is confirmed in Larimer County.

To offset the removed ash trees, the department planted a variety of site-adapted trees last year, including bur oak and Rocky Mountain maple, at its campgrounds and trailheads.

LOOKING AHEAD

With $1.5 million in grant funding now secured and department funds allocated, Larimer County will begin restoring the Cache la Poudre River at River Bluffs Open Space this fall. Work is needed to make the river and its floodplain more resilient during flooding and ensure it provides healthy habitat for fish and wildlife.

This year, Larimer County will install boot brush stations at four of its trailheads to educate visitors on a best practice to help prevent the spread of noxious weeds. The stations are a joint project among Larimer County, City of Fort Collins, Boulder County, U.S. Forest Service and Colorado Department of Agriculture.

In 2017, Larimer County secured in-stream flow rights for Sand and Boxelder creeks on Red Mountain Open Space through the Colorado Water Conservation Board, which holds the rights. In addition to these waterways, Larimer County is in the process of securing in-stream flow rights for several other perennial creeks and streams that flow through its conserved properties.
CONNECTING OUR CITIES’ PAVED TRAIL NETWORKS

On Nov. 14, 2017, the first paved trail connecting Loveland and Fort Collins officially opened to the public. After a ribbon-cutting ceremony, eager bikers joined elected officials and staff on a joy ride along the trail.

The 2-mile Colorado Front Range Trail - Loveland to Fort Collins Connection runs between Lemay Avenue and Timberline Road on the east side of the cities. It is open to foot traffic and non-motorized bikes.

By using this new trail, people can go from the 35 miles of paved trails in Fort Collins’ system to the 18 miles of trails in Loveland’s system without hopping off their bikes or getting in a vehicle.

The trail is a joint project among Larimer County, City of Loveland and City of Fort Collins, with funding from the Colorado Department of Transportation and Colorado Parks and Wildlife’s State Trails Program.

TRAINING RANGERS TO EXCEL

Every year, Larimer County Department of Natural Resources hosts Ranger Excellence School for rangers and other outdoor recreation professionals from across Colorado and beyond.

Established in 2011, the popular training conference offers classes over a week in a variety of areas, including self-defense, wilderness first aid, firearms, driving and swift water rescue. On the last day, a series of hands-on scenarios ties everything together. Along with training, Ranger Excellence School offers a venue for rangers who work on parks and open spaces to network and share ideas.

Ranger Excellence School is endorsed by the Colorado Open Space Alliance and Park Law Enforcement Association (PLEA). In 2018, it was honored with a President’s Award from PLEA. Registration opens in the spring at www.larimer.org/naturalresources.
Larimer County Department of Natural Resources strives to offer top-notch services on its parks and open spaces, regularly improving its facilities, parking areas and trails to provide the best possible experience for its visitors.

OPENING NEW TRAILS AT HERMIT PARK

Last summer, Larimer County Department of Natural Resources opened two new trails at Hermit Park Open Space, both accessible to hikers, bikers and horses.

The Moose Meadow Trail travels 1.5 miles along a scenic, grassy area where moose are often seen, before heading south onto the national forest and leading to Homestead Meadows.

The Limber Pine Trail connects with the Moose Meadow Trail, Kruger Equestrian Campground and Kruger Rock Trail, meandering for 2.5 miles through forests of pine and aspen trees. Eventually, it will connect to the Hermit’s Hollow Campground and a new trailhead planned for the saddle area.

The new trails were built by the department’s trail crew with help from volunteers and Larimer County Conservation Corps crews.

In 2018, the department plans to complete the Limber Pine Trail and open new trailheads.

In 2017, crews broke ground on a second paved trail connecting Loveland and Fort Collins’ paved trail networks. The 4.4-mile Long View Trail will connect the trail networks on the west side of the cities and provide another safe, non-motorized alternative to traveling between them. It is a project among Larimer County, Loveland and Fort Collins. The trail is slated to open in the summer of 2018.

In April of this year, Larimer County wrapped up a renovation of the South Shore area of Carter Lake. The popular camping and day use area was upgraded with additional electric campsites, new restrooms, resurfaced parking areas and improved boat ramp access. New and existing campsites at South Shore can be booked at www.larimercamping.com or (800) 397-7795.

This year, Larimer County will renovate Forks Park, which was devastated during the Big Thompson River flood in 2013. The park, located in Drake where the North Fork Big Thompson River flows into the main stem, will feature a new parking area, restroom and river access for fishing. Along with the new infrastructure, the Colorado Department of Transportation is implementing restoration of the river through Forks Park, including improved flood mitigation and fish habitat.
SAFETY BEGINS WITH YOU

Please be courteous to everyone and follow the rules to keep us all safe.

- Adult and child life jackets are required on the water.
- Stay 150 feet away from shoreline to avoid creating wake that can dislodge rocks and float debris into the water while in playboats, jet skis, personal watercrafts and other motorized boats.
- Boaters must give 150 feet of space to swimmers and other watercrafts at all times.
- Boaters must ensure that engines are trimmed and motors are shut off when within 150 feet of the shoreline.
- All motorized boats must be inspected for Aquatic Nuisance Species before being launched.
- Boaters must give 150 feet of space to swimming areas, anglers and all watercrafts, including non-motorized boats, watercrafts, sailboards and kayaks.
- Boaters must ensure that engines are trimmed and motors are shut off when within 150 feet of the shoreline.
- Boaters must ensure that engines are trimmed and motors are shut off when within 150 feet of the shoreline.

WHAT LIVES HERE?

INTERPRETING A POPULAR PARK

In the spring of 2017, Larimer County Department of Natural Resources opened an interpretive lobby in the Horsetooth Area Information Center at South Bay of Horsetooth Reservoir.

Catering to the tens of thousands of annual visitors to the Horsetooth area, the lobby contains 20-plus panels – some the size of an entire wall – to help visitors plan their trip and learn about the area’s fascinating history, ecology and geology.

Several interpretive displays are interactive, encouraging visitors of all ages to learn about the fish of Horsetooth Reservoir, how and where the reservoir gets its water and the legend of Horsetooth Rock, the area’s prominent landmark. The centerpiece of the interpretive lobby is a 3-dimensional, topographic map of the Horsetooth area, designed as a trip-planning tool.

Both residents and out-of-towners are invited to peruse the award-winning interpretive lobby on their next visit to the Horsetooth area. Last fall, the lobby garnered the Outstanding Environmental Education Program award from the Colorado Open Space Alliance.

PUBLIC ENGAGEMENT: 2017 BY THE NUMBERS

195 volunteers donated 27,047 hours of service to Larimer County Department of Natural Resources. 5,701 people participated in 140 activities including guided hikes, school field trips, campground programs, community events, trailhead tables, trainings and more.

195 volunteers donated 27,047 hours of service to Larimer County Department of Natural Resources. 5,701 people participated in 140 activities including guided hikes, school field trips, campground programs, community events, trailhead tables, trainings and more.
Larimer County Department of Natural Resources offers educational and volunteer opportunities for people of all ages to learn about the natural world, make a difference on their parks and open spaces, and get into the great outdoors.

**VOLUNTEERING TO BUILD A BETTER LARIMER COUNTY**

Volunteers add tremendous capacity to Larimer County Department of Natural Resources. In 2017, nearly 200 volunteers donated their time and talents to enhance programs and services, by monitoring wildlife, hosting campgrounds, leading education programs, taking pictures, assisting rangers, patrolling and building trails, removing weeds, helping at events and performing many other duties. Thank you to all our amazing volunteers for their service!

This year, the department would like to recognize the following organizations and corporate groups for their ongoing commitment as volunteers:

- Advanced Energy
- ASU Northern Colorado Alumni Club
- Centennial Bass Club
- Colorado Addicted Trailbuilders Society
- Colorado College
- Colorado State Forest Service
- Colorado State University
- Diamond Peaks Mountain Bike Patrol
- EKS&H
- Estes Park Cycling Coalition
- Friends of Larimer County Parks and Open Lands
- Front Range Community College
- Hewlett-Packard (HP)
- In-Situ
- Intel
- Larimer County Horseman’s Association
- Northern Colorado Astronomical Society
- Northern Colorado Climber’s Coalition
- Overland Mountain Bike Club
- SCHEELS
- Sierra Club
- Team B.O.B. (Babes on Bikes)
- Trailcology
- YMCA of the Rockies

**CONNECTING KIDS TO THEIR LOCAL OPEN SPACE**

Last summer, Larimer County Department of Natural Resources hosted a series of guided hikes for members of the local Boys & Girls Clubs. During the hikes, kids ages 8-12 learned about wildlife, ecology and Leave No Trace ethics as they explored the open space closest to their homes. The Wellington club visited Red Mountain, Fort Collins club visited Horsetooth Mountain and west Loveland club visited Devil’s Backbone.

The department regularly hosts special request programs for community groups. To request a program, visit www.larimer.org/NReducation.

**LOOKING AHEAD**

**Why does the Devil’s Backbone jut out of the prairie so dramatically?**

What material used to be mined in the Devil’s Backbone area? What birds can be spotted at Devil’s Backbone?

In 2018, Larimer County will be installing new interpretive signs at Devil’s Backbone Open Space about the geology, history and ecology of this popular recreation area. The overall theme of the interpretive signs is time: from the forces that shape the earth over millennia, to the impact humans have on a landscape in a person’s lifetime, to the migration birds make over a year.

**During the spring, summer and fall, Larimer County educators host Tiny Trekkers programs for 2- to 5-year-olds and their parents. These programs connect little ones to nature through crafts, stories, games and fun facts.**

Usually held monthly, they are highly popular and often fill, so starting this spring, Tiny Trekkers will be held twice a month on the second and fourth Tuesday. Programs will be held at Devil’s Backbone Open Space near Loveland and River Bluffs Open Space between Timnath and Windsor. To sign up for Tiny Trekkers, visit offero.larimer.org.
PARTNER SPOTLIGHT: GREAT OUTDOORS COLORADO (GOCO)

Larimer County Department of Natural Resources has achieved the 50,000-acre milestone for land conservation in the county thanks, in a large part, to the support of its partners. A significant partner for Larimer County over the years has been Great Outdoors Colorado (GOCO). Over more than two decades, GOCO has awarded Larimer County $25.2 million in grant funds to help the County conserve land, enhance trailheads and facilities, build trails and connect people to nature, among other impacts. On behalf of the citizens of Larimer County, the department thanks GOCO for its ongoing support of conservation and recreation. Thank you!

GOCO has awarded significant grant funds to the department, allowing it to leverage other revenue sources many times over. Pictured below are a few examples of the lands GOCO has helped the department to conserve:

- Red Mountain Open Space
  - 14,980 acres
  - Photo © John Fielder

- Hermit Park Open Space
  - 1,362 acres
  - Photo © Ally Louie

- River Bluffs Open Space
  - 161 acres
  - Photo © Brendan Bombaci

- Eagle’s Nest Open Space
  - 827 acres
  - Photo © Brendan Bombaci

- Long View Farm Open Space
  - 599 acres
  - Photo © Harry Sahrsky

- Sylvan Dale Conservation Easements
  - 1,161 acres
  - Photo © Richard Snell

GOCO funds were used to conserve all or a portion of the acres listed for each property.

The Great Outdoors Colorado Trust Fund was created in 1992 when voters approved Amendment Article XXVII to the Colorado Constitution. It directs a portion of Colorado Lottery profits to GOCO for projects that preserve, protect and enhance the state’s wildlife, park, river, trail and open space heritage, and created a board of trustees to govern distribution. Learn more about GOCO at www.goco.org.
Revenues for Larimer County Department of Natural Resources are realized from a number of sources and totaled $24.5 million in 2017. Expenses for 2017 were $25 million, including a number of one-time capital development projects on County parks and open spaces.

### 2017 Revenues

- **User Fees & Service Charges**: 22%
- **Specific Designated Taxes**: 27%
  - Help Preserve Open Spaces Tax
  - Pest District Property Tax Levy
- **All Other Revenue**: 14%
- **Intergovernment**: 36%
- **General County Governmental Funds**: 1%

### 2017 Expenses

- **Open Lands Acquisition & Development**: 62%
- **Open Lands Management**: 14%
- **Pest (Weed) District**: 4%
- **Forestry Services**: 0.5%
- **Park Operations**: 12.5%
- **Parks Capital Projects**: 7%

*These figures are not audited. Audit will be completed in mid-2018.

### Help Preserve Open Spaces Tax Revenues

Revenue from the 1/4-cent Help Preserve Open Spaces sales and use tax is shared among Larimer County and the eight municipalities in the county. The tax was extended in 2014 and will sunset in 2043. It is not imposed on food or prescription drugs. The total revenue collected to date is more than $211 million.

Distributions to municipalities are based upon the highest yield of either population or sales tax generation. This revenue sharing agreement ensures that residents throughout Larimer County receive benefits from the Help Preserve Open Spaces tax.

*These figures are not audited. Audit will be completed in mid-2018. Figures in this chart have been rounded where appropriate.
