AGENDA REVIEW

DISCUSSION/DECISIONS

- a) A proposed 2020 meeting schedule was presented. This would call for the TAC to meet monthly from January through May, then meet again in September and

December. It was decided the group would consider adopting this schedule but would postpone a final decision until March or April 2020.

b) A handout summarizing the “Achieving Impacts” Logic model and feedback from the August meeting was provided.

c) The TAC was split into five groups. Each group was assigned one or two scenarios, based on those used in the “Achieving Impacts” Logic model. Each group assessed the services needed by the individual in their assigned scenario(s). The entire TAC group then discussed the needed services that had been identified and listed resources that would meet those needs. It was determined that care coordination services specific to Behavioral Health needs are not currently readily available. Many resources were listed for other identified needs. The results of this exercise will be used to begin to create a resource map.
