River Bluffs Open Space boundary

Cache la Poudre River

Improve riverbank

Remove concrete and other large debris

Remove fence and replace with wildlife-friendly fence

Fill behind berm to provide mild sloping ground to relic channels. Establish native upland plant community.

Overflow channels

Create riffles for fish habitat

Remove old fill, contour and establish native plant community

Regrade high bank to create riparian terrace planted with native species

Fill entrance to relic channel to divert water back to river

Create point bar

Fill pond to restore riparian/wetland habitat

Lower bank to direct flows back into river. Establish native grasses and willows.
